

The Spacemaker Loft

Reference: CL120195

Price: £2,650 (exc. VAT)

Another of our lofts primarily for Early Years Foundation and Key Stage 1 classrooms, our spacemaker loft lives up to its name by providing additional and flexible space that can be tailored to the needs of a particular year group in any given year.

The lower section of the Spacemaker sits directly against a classroom wall and does not include a panel to the rear. The wall opposite the staircase has a half panel wall. To the front there is a full panel that incorporates two open windows, while to the side with the staircase, a full panel wall incorporates another open window and doorway.

The open doorway and windows act as prompts when the loft is being used as a role play area and allows children to imagine that their loft is a shop or garage one day and a secret underground cave the next.

A sturdy staircase leads to the platform above which again can be used as a role playing area or a quiet learning space for individuals or small groups.

Balustrade rails protect the upper loft and staircase.

The stairs and upper loft are fitted with soft floor tiles.

The balustrade rails above and the wooden panels below can be used to showcase children's work and so personalises the loft.
