

## Play & Store - Corner Shop

Reference:PS150548

Price: £1,285 (exc. VAT)

**The Corner Shop gets its name from the low set integral “window” in the front left hand door of this Play & Store unit.**

The double doors are hinged with piano hinges and bolted at the top to prevent mishaps involving little fingers.

The internal space is not partitioned, allowing large items to be stored easily and facilitating ease of access.

The corner shop includes a removable “secret” integral window in the left hand door and a removable “secret” integral door in the right hand one. Both of these are removable items are held in-place by bolts inside the unit.

As with all our Play & Store units, you have control over which elements are open and which are closed, this may either depend on the items stored within or on the way the unit is being used at any particular time.

The Corner Shop may in fact be a theatre one day and have an open ticket office and stage door, the next it may be a road side burger bar with hatch only open; but whatever its use, all toys and equipment can be securely stored away at the end of each day.

All prices shown are excluding VAT unless otherwise stated.

\*Anything above Edinburgh/Glasgow will incur an additional cost, please contact us for details.

### Specification

All our products are built to fully comply with EN1176-1 playground regulations

### Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

#### Doors

##### Play & Store

All our doors are built with safety as a paramount concern. All are a special non-trap design, using a piano hinge down the whole length of the door, and then a rebate on the inside of the hinged side.

- When the door is in the closed position there is a taper between the door and frame, so should little fingers be left in the way they will not be pinched.
- The doors are made using 100mm x 50mm frame and then TGV attached

The cut out inserts are made from 12mm external WBP plywood with TGV glued and pinned to it.

#### Floor

##### Play & Store

- The decking boards are top quality 35mm x 125mm grooved redwood boards that are pressure treated.
- The deck boards are screwed to the pressure treated 50mm x 100mm timber bearers

## Roof

### Play & Store

A standard finish, which is good at keeping out the weather

- 12mm wbp external grade plywood.
- A layer of BBA approved weatherproof membrane is fitted to the plywood.
- A layer of 38kg mineral felt will be fitted as the top surface and secured using galvanised staples.
- In the case of a large roof, pressure treated batons are fitted perpendicular to the roof felt.
- A fascia and soffit board are fitted.
