

Play & Store - The Garage

Reference: PS150550

Price: £1,595 (exc. VAT)

The Play & Store Garage is our second largest unit in this versatile range. It has three doors to the front two of which open to the right hand side whilst the door to the far left opens to the left hand side.

All doors are hinged with "piano" hinges and each door is independent of the others to maximise versatility and flexibility of use. Each door also has a bolt at the top, far away from little fingers.

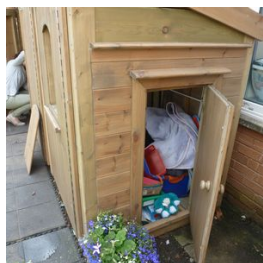

The door on the front far right has a "secret" removable inset window with window ledge, there is also a smaller "secret" hinged door on the right hand side. Both of these open from the inside.

This additional access point is useful when it comes to storing or removing large items from inside the unit but more importantly creates an additional entry or exit point in active play games.

As with all our Play & Store units there are no internal doors and this facilitates ease of storage as items don't have to be a particular size to fit in a particular space.

The lack of internal barriers also means that there is an "easy flow" to our units and lessens the potential for hiding as children are naturally drawn to the next exit point.

As the sizes of our Play & Store units increase so do the options of storage and play time use; again the teacher has the choice of which and how many doors to open according to the requirements each time the unit is used.

- Please contact us for delivery prices
- FREE delivery for all Mainland UK orders over £3,000 *

All prices shown are excluding VAT unless otherwise stated.

*Anything above Edinburgh/Glasgow will incur an additional cost, please contact us for details.

Specification

All our products are built to fully comply with EN1176-1 playground regulations

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Doors

Play & Store

All our doors are built with safety as a paramount concern. All are a special non-trap design, using a piano hinge down the whole length of the door, and then a rebate on the inside of the hinged side.

- When the door is in the closed position there is a taper between the door and frame, so should little fingers be left in the way they will not be pinched.
- The doors are made using 100mm x 50mm frame and then TGV attached

The cut out inserts are made from 12mm external WBP plywood with TGV glued and pinned to it.

Floor

Play & Store

- The decking boards are top quality 35mm x 125mm grooved redwood boards that are pressure treated.
- The deck boards are screwed to the pressure treated 50mm x 100mm timber bearers

Roof

Play & Store

A standard finish, which is good at keeping out the weather

- 12mm wbp external grade plywood.
- A layer of BBA approved weatherproof membrane is fitted to the plywood.
- A layer of 38kg mineral felt will be fitted as the top surface and secured using galvanised staples.
- In the case of a large roof, pressure treated batons are fitted perpendicular to the roof felt.
- A fascia and soffit board are fitted.
