

The Retreat Shelter

Reference: SH100711

Price: £3,290 (exc. VAT)

This attractive and practical corner playground shelter creates a flexible and adaptable outdoor learning and play space.

Available in three sizes this shelter provides a school with a versatile and open space that can be used as a location for outdoor lessons and/or role play as well as a super spot for playing and catching up with friends at break times

A large entrance under a raised apex with a small octagonal window creates a very spacious feel with plenty of headroom for adults and lots of space to minimise congestion and provide ease of access for all abilities.

At the rear of the shelter there is a solid wall with three non-opening glazed windows. The windows are set at differing heights providing protection, look out points and decorative interest.

The sides have low panel walls that provide some protection against the elements while still ensuring that the shelter is a lovely open space where children will get plenty of fresh air.

The seating can be provided as an optional extra in all sizes of this shelter but would incur extra cost.

Seating in the smallest size of this retreat shelter would accommodate an average of 11 children with the others providing seating for an average of 13 and 16 children.

Colours

Finished with Timber Protection.

Deep Olive (Discontinued) - No longer available

Opal White

General Information

Guarantee

Our Playground shelters are guaranteed against structural and design defect for 3 years - this does not cover acts of vandalism, misuse or exceptional natural events.

Walls and general construction

- Polycarbonate glazing sheet is guaranteed unbreakable for the life of the product
- As long as the maintenance instructions are adhered to, the product will last substantially longer

Maintenance that is required

- Ensure that an air gap is maintained under the base and around all sides; check on an annual basis to ensure that there is not a build-up of debris
- The wood preservative paint will need re-coating every so often; (the same type of time scale as your house) this does depend on the prevailing weather conditions but would typically be 2 - 4 years.

Delivery & Installation

- We are happy to deliver throughout the United Kingdom and Europe
- Our products are delivered by our team or occasionally in the case of small items, by a trusted courier.
- Please contact us for delivery prices
- FREE delivery for all Mainland UK orders over £3,000 *

All prices shown are excluding VAT unless otherwise stated.

*Anything above Edinburgh/Glasgow will incur an additional cost, please contact us for details.

Specification

All our products are built to fully comply with EN1176-1 playground regulations

Build Specification

The following specification reflects that of the featured build with the price shown at the top of this document. Please refer to our website for details on other build options.

Doors

Doorways

Open doorways are normally used on our castles or open structures, providing a great access route to all areas

- Made from good quality redwood, planed with swept edges
- Fits snugly within the wall of the structure to give a neat doorway/entrance
- Fully treated in your choice of colour from our standard range

Floor

Decking - Ground level

- The decking boards are good quality 38mm x 125mm grooved redwood boards that are pressure treated.
- The deck boards are screwed to the pressure treated timber bearers
- A weed prevention membrane is fitted below the decking to ensure that there is no plant growth up through the boards.

For an additional cost the decking can be painted with an anti slip paint, please ask for details.

Roof

Mineral Felt

A standard finish, good at keeping out the weather but not the most aesthetically pleasing of our roof options.

- The roof bearers are fitted to span across the apex: the size would depend on the span but it would be a minimum of 75mm x 50mm. The timber would be good quality redwood, planed with swept edges
- 12mm wbp external grade plywood is fitted to the top surface
- A layer of BBA approved breathable membrane is fitted as an underfelt
- A layer of 38kg mineral felt is fitted as the top surface and secured using galvanised staples.
- In the case of a large roof, pressure treated batons are fitted perpendicular to the roof felt
- The roof edges will be secured with a fascia board, the top finished with a ridge board and trim is fitted to the bottom.
- Guttering is always recommended and can either be fitted by us or retrospectively by you once installed.

Windows

Non opening glazed

- The windows are built as separate units; once they have been sanded and treated they are glazed with 2mm polycarbonate sheet. They are then fitted and sealed using clear silicon into the wall.
- The polycarbonate used is completely clear and will not fade or become brittle with time; it is 200 times the strength of glass making it virtually shatter proof.

Other Options

This shelter can be customised to your preference by changing the build specification. The different build levels are explained in detail on our website.

This table shows the cost of the different build levels that are available.

	Mineral Felt	Felt Shingles	Cost of seating
1.8m x 1.8m (5ft 9in x 5ft 9in)	£3,290	£3,460	£290
2.1m x 2.1m (6ft 9in x 6ft 9in)	£3,790	£4,010	£310
2.4m x 2.4m (7ft 9in x 7ft 9in)	£4,545	£4,840	£375
